

Declaration

The International Scientific Conference was held in the framework of a project supported by the Visegrad Fund " Creating a platform to address the techniques used in agriculture and economic groundwater mngmt" from 6 April to 08 2018. This project is being implemented by the Mendel University in Brno in cooperation with the Slovak University of Agriculture in Nitra, the Uniwersytet Rolniczy im Hugon Kollataja w Krakowie and the University of Debrecen.

The conference was held at the premises of Křtina Castle in Mendel University in Brno.

The conference was attended by 50 academic staff, including docotrands of foreign and Czech universities and other institutions. The international participants were 23 of the eight delegations of universities and universities of Bulgaria, Serbia, Croatia, Slovakia, Poland and Ukraine.

The purpose of the conference was to meet all stakeholders involved in addressing defined environmental and civilization threats. The procedure for solving the issues solved by the project was discussed as well.

The participants concluded that the conference fulfilled its purpose and expectations. They have also recommended continuing to create and develop a platform focused on the above-mentioned issues defined in the Visegrad Fund project.

In Brno, 08. 04. 2018
